## Sports Day Huge Success

### Large Crowd Enjoys Big Time

The first sports day sponsored by the Didsbury Boys' Band was an unqualified success when close to 500 people turned out to give the band boys a boost and incidentally enjoy a number of good ball games and have plenty of fun. The midway, although not quite a mile long, did a rushing business all afternoon, with the "House-House" games and coconut shy providing the most entertainment.

The sports were of a high calibre and kept the crowd entertained continuously. Games were run off promptly on schedule, so that there was not a dull moment during the entire program. Baseball, the main event, provided three fine games. Oids winning the final by trouncing Westerdale 7-0 after eliminating Didsbury 9-1 in the first game. Jim McKay was the big noise for Oids, pitching both games for the winners and allowing only one run in fifteen innings of baseball. Oids were full value for their win, giving their pitcher almost airtight support, and hitting almost at will in both games. Innisfail and Westerdale provided the best game from the viewpoint of the fans, playing seven innings to a score of 6-4 in favor of Westerdale. The teams were deadlocked at 2-2 until the sixth session when Westerdale scored four times. In the final inning Innisfail scored twice and had a fine chance to tie up the game, but Mickey Jackson settled down and pitched very fine ball to get himself out of a nasty hole and win the game.

Didsbury All-Stars won the softball tourney by defeating Molvin Go-Getters 9-5 in a snappy game featured by heavy hitting and fine fielding.

The foot races provided lots of fun for the younger people. Under the fine management of Bill McFarquhar the races were run off without a hitch and some fine running was seen.

### Streets Thronged to See Parade.

The parade Wednesday afternoon was given little support and had a very limited number of entrants in each section. Although not as big (continued in next column).

## Memorial Service on Sunday, 3 p.m.

The annual memorial service of the Didsbury branch of the Canadian Legion will be held on Sunday August 12 at 3 p.m. at the Memorial.

All returned men of the district are requested to assemble at the Oddfellows Hall at 2 p.m. Fall in at 2:30. The march to the Memorial will be headed by the Didsbury Boys Band. Medals will be worn.

The public are cordially invited. During the Service opportunity will be given for the placing of flowers at the base of the Memorial.

It is hoped that all ladies and children present will remember this annual floral tribute.

As expected it was quite a success and the streets were thronged to see the fun. Led by the band the parade started off at the school grounds, marched down Main Street and back, thence to the baseball grounds where the sports were held. Miss Edith Chambers was awarded the prize for the best decorated car.

Miss Dorothy Ranton won with her float advertising Alberta Government Telephones.

Ralph Edwards with his Shetland pony won the prize for the best pet, while Lawrence Gabel won with the best decorated bicycle.

Ernest Clarke copped the money for the best clown and provided a heap of fun to the spectators, while the best comic vehicle was that of Warren Matheson, his horse and cart being a joy to behold.

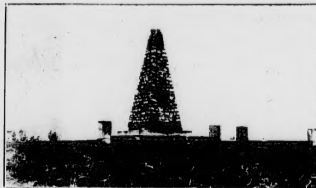

Another entry well worthy of mention was the motor vehicle made and operated by Harold Hardy. This car is a work of art and drew many fine comments and laughs from the crowds.

The band rendered a number of selections during the afternoon and kept the crowd both entertained and pepped up, with the result that everyone left the grounds praising the excellence of the sports and saying that the entertainment was the best staged in Didsbury during the past few years.

The Canadian Legion of the British Empire Service League  
Didsbury Branch No. 106

## MEMORIAL SERVICE

For the Men of the Didsbury District  
Who Fell in the Great War, 1914-1918

"They shall not grow old, as we that are left grow old;  
"Age shall not weary them, nor the years condemn.  
"In the going down of the sun, and in the morning  
"We shall remember them."

At The Butte

Sunday, August 12th, 1934, at 3 p.m.

## Vacation School for Children

The vacation school for children of the Sunday schools, from 5 to 13 years of age, will be held again this year at Knox United Church from August 13 to 24.

The school is interdenominational and all the children who are interested are urged to attend. The program for each day will be as follows:

9 to 9:03	"O Canada"
9:03 to 9:05	Pledge to the Flag
9:05 to 9:45	Sing-Song
9:45 to 10:00	Worship period
10:00 to 10:20	Games
10:20 to 10:45	Story & Discussion
10:45 to 11:45	Handicraft
11:45 to 12:00	Roll-call

## WEDDINGS.

VIFOND-HYDE.

A quiet wedding was solemnized at the Central United Church, Calgary, on Wednesday, August 1, when Olive Irene Hyde, youngest daughter of Mr. and Mrs. Fred Hyde of Didsbury, became the bride of Allan Fred Vipond of Didsbury. The Rev. A. J. Mitchell officiated.

The bride entered the church with her father, who gave her in marriage. Her becoming gown was a floor-length model of pink satin and veils. With it she wore a picture hat of pink mohair, and Premier American Beauty roses and maidenhair fern formed her bouquet.

Mrs. C. P. Reimer, sister of the groom, was matron-of-honor, wearing blue flowered silk chiffon with grey accessories, and carrying yellow barberry roses. Miss Muriel Hall, bridesmaid, wore a mauve net gown with white picture hat. Mr. C. P. Reimer attended the groom.

Following the ceremony a reception was held in the banquet room of the Hotel York, at which relatives attended.

Mr. and Mrs. Vipond left by motor for Yellowknife Park; the bride travelling in a navy suit with white accessories. Upon their return they will make their home at Didsbury.

LITTLE-O'BRIEN

St Saviour's Anglican Church, Vancouver was the scene of a quiet wedding on the evening of July 21, when Florence Niall, the eldest daughter of Mr. and Mrs. W. A. O'Brien became the bride of Mr. George Little, Vancouver, with Rev. Samuel Tra officiating.

Given in marriage by her cousin, Mr. Fred Weir, the bride was charming in a navy blue ensemble with white hat and corsage bouquet of carnations and gladioli. Attending the bride was Mrs. J. W. Little, while the groom was supported by his brother, Mr. John Little.

Following the ceremony a reception was held at the home of the groom's brother.

Mr. and Mrs. G. N. Little will reside in Vancouver.

## WEEKLY JOKE

"Daddy, I don't think mother knows much about raising children," said little four-year-old Mary Jane.

"What makes you think so?" asked the father.

"Well," said the little girl, "she makes me go to bed when I am wide awake and makes me get up when I am awfully sleepy."

## WEEKLY SERMONETTE

"No man can tell how great may be the demand made upon him nor when it will come—therefore he cannot afford ever to sag below his best."

## United States Joins The I.L.O.

More than ordinary significance attaches to recent decision of the American Congress to apply for full membership of the International Labor Organization at Geneva, usually referred to as the I.L.O. Not only will accession of the United States add considerably to the prestige that organization now enjoys, but, bringing as it will the U.S. into direct confrontation with this important branch of League of Nations activity, the move will do much to restore prestige lost by the parent body through recent defections, notably that of Japan.

Press despatches have revealed little of the background, few of the motives, behind this change of front on the part of the Washington government. It is true, of course, membership of the International Labor Organization does not involve endorsement of the League covenant, nor does it entail any political commitments to the League as such. In fact, the U.S. desire to provide adequate safeguards against the "foreign entanglements" that country has so rigorously eschewed since the war, is exemplified in the act of Congress which specifically declares that the United States, by membership in the I.L.O. shall assume "no obligations under the covenant".

This, of course, is possible. The International Labor Organization, like the World Court upon whose bench the United States long has been represented, is an autonomous section of the League of Nations. Membership in either or both is possible without acceptance of the covenant. Germany, as a matter of fact, was an active, full-fledged member of the I.L.O. for six years before becoming a member of the League of Nations. The connection between the organization and the League is derived not from the covenant but from the charter of the I.L.O., which is Part XIII of the Treaty of Versailles.

The International Labor Organization is, however, much closer to the League than is the World Court for the reason that it is, essentially, a means of getting international legislation enacted, or treaties negotiated, as is the League itself. The heart of the League system is its permanent mechanism for continuous international negotiation, and the I.L.O. parallels this machinery throughout, in its limited field of social questions.

The importance of the United States' decision to join the International Labor Organization, therefore, can best be deduced by considering it in relation to the economic problems created by varying standards of living, hours of labor and rates of wages, in nations now competing for foreign markets, and also by contrasting the present action with Washington's past attitude towards the Geneva labor office.

Hitherto, the United States has been far colder to the I.L.O. than to any other branch of League activity. Until one year ago, the United States government would have nothing whatever to do with the labor organization, but now, without any parade or ill-humor, Congress has accepted, virtually without demur, the proposal to apply for membership. This will involve representation on the permanent secretariat at Geneva and ultimate appointment of American representatives to the personnel of the central office.

Psychologically, the action of Washington will have more far-reaching effects. It will give Japan, Germany and Italy "furious to think" for, if President Roosevelt can persuade Congress to make so complete a volte face in so short a time in connection with one great section of League activity, it follows that but little additional pressure would be required to convert his legislators to the idea of accepting the League covenant. Despite present reticence, and the insistence upon non-political safeguards, American opinion relative to the League is undergoing a change and that change is not so far short of accepting League membership as to make that end remote. If it comes to pass that the United States enter the League, that body will immediately assume grander and nobler proportions in the eyes of the world, and the dreams of those who called it into existence will be within sight of fulfillment.

### China Holds Cricket Fights

Sportsmen Will Pay Ten Dollars For Good Fights

A great effort is being made in China to stamp out cricket-fighting. It is being made as great a legal offense as opium smoking, and punishable with equally severe sentences. Despite the efforts made to stop the "sport," an enormous amount of it goes on. Chinese will pay as much as \$10 for a good fighting cricket, and many make it a business to breed them and train them for fighting, in the same way as cocks used to be trained for the old English sport of cock-fighting. The crickets race each other in elaborate bamboo "rings" down the middle of which a glass slide runs, through which the fighters glare at each other until such time as their ire is sufficiently North Dakota. South Dakota, Nebraska for the attack. Large stakes broods, Kansas and Oklahoma to the change habits during the fights.

### Plans Big Undertaking

Hundred-Mile Wide Shelter Belt Being Considered By Roosevelt

President Roosevelt is considering a proposal to plant a "shelter belt" of trees 100 miles wide and stretching across the United States from Canada to the Texas panhandle.

This gigantic scheme, requiring 10 to 12 years to complete, would aim to minimize drought and help prevent winds from stripping farm lands of their choice soil. It was announced recently by the American Tree Association. Planting in the 100-mile wide area would be in strips, running north and south.

There would be 100 strips of trees or one to a mile. The shelter belt would stretch 1,300 miles through North Dakota, South Dakota, Nebraska for the attack. Large stakes broods, Kansas and Oklahoma to the change habits during the fights.

## Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint or any Looseness of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 30 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get Dr. Fowler's when you ask for it, and be on the safe side.

Put up only by The F. M. L. Co., Ltd., Toronto, Ont.

### Project May Succeed

New Process Being Tried To Dredge Gold From Fraser River

The golden wealth in the sands of the Fraser river, which has till now proved largely elusive to the efforts of man, and of which there is said to be enough to pay the national debt of Canada many times over, is to be attacked this summer with a new type of dredge, and with what appears to be every prospect of success.

The structure, now nearing completion, is the largest work of its kind ever attempted on the Pacific coast, incorporating for the first time anywhere in the world an entirely new process as applied to gold dredging.

Built under the engineering advice and supervision of Hume Robertson, placer mining engineer, who has had 20 years' experience in that kind of work with British companies in the Malaya Peninsula, the great bulk may now be seen assuming final shape at the shipyards of B.C. Marine Engineers and Shipbuilders Limited.

Hydraulic pumps, with suction strength of 200 pounds to the square inch, created by two 500-h.p. motors will raise the sands from the bottom of the river and the complete process of washing and refining will be completed upon the dredge.

Capacity, with the present equipment, is placed at 12,500 cubic yards a day, but provision has been made for double the present sluicing area by the addition of an upper deck, on an incline of 13 feet from bow to stern.

The whole operation will be electrically driven with individual motors and control switches on the bridge towards the bow of the structure. Present estimates indicate an operating cost of not more than two cents a cubic yard.

Hydro-electric plant to be constructed on Jones Creek, near where the dredge will be put into operation, and will generate 2,000 horse-power. It is understood that work upon this phase of the undertaking is to start at once.

If the operation of the first dredge proves successful, and every possible safeguard against failure seems to have been taken, the company will proceed to the construction of other dredges of similar model.

Smaller units will be needed in some parts of the river under lease, but all will incorporate the present equipment, with such improvements as practice may suggest.

### Turns Page In History

British Girl Retains Nationality Although Married To Frenchman

An English girl of 21 has turned a new page in the story of English women's fight for equal rights with men.

For pretty Ida Goss, of Stannmore, Middlesex, has become a Mme.—or rather Mrs. Lucien Albert of Paris—and retained her British nationality. She is the only Englishwoman to have married a Frenchman or any foreigner and remained British.

Shyly she told of how she wrote to the Home Secretary on her engagement, explaining her patriotic desire; of the long negotiations with French and British authorities.

She went to Paris to be married—on Boxing Day. Since then, presumably, she has had no nationality doubts now.

She displayed the new British passport, in her married name, which she has just received. Written in by hand was read: "British subject under the provision of the British Nationality and Status of Aliens Act, 1932, wife of a French citizen."

### Year Of Anniversaries

At Least Three Will Be Commemorated During 1934

That 1934 is a year of anniversaries was recalled by Victor Morris, chairman of the Montreal committee on the Jacques Cartier observance, in the Quebec Women's Institutes convention.

In 1931 occurred the discovery of Canada by Jacques Cartier; in 1634, the extension of the colony by the founding of the Montreal settlement; in 1734, the opening of the first road between Quebec and Montreal; and in 1834, the granting of its charter to Toronto.

### Some Long Sleeps

But Record Of Rip Van Winkle Still Stands

A Huddersfield man has had no sleep for eight weary years. Not even morphine can give him an hour of real sleep. How he must envy such a man as W. Foxley, pot-maker to the Mint, who fell asleep on April 27th, 1946, and slept serenely for fourteen days and fifteen nights. Fourteen days is only a nap compared with the exploits of some sleepers. A German civil servant named Arnold, forty-five years old, slipped one evening as he got out of a train and knocked his head on the pavement. He was taken home and put to bed. The doctors said there was no concussion or serious injury. Next morning he was still asleep, and he slept for two years and four months. He was a wreck when at last he woke, yet in the end he recovered. There was the famous Marguerite Bevenot, the Sleeping Woman of Theobalds, who was thrown into a trance-like sleep by a fright and slept for nineteen years and six months. Then she slowly roused, was able to talk, but she was wasted to a skeleton, and died five months later. The record Rip Van Winkle is an American, a farmer called Harms. He came in one evening, tired after a long day's work, went to bed and slept for twenty-six years. It was possible to raise him to take food, but he could not stay awake more than five minutes. Like the French woman sleeper, he wanted away and died.

### May Join League

By Doing So Russia Would Gain Considerable Advantage

Russia, it is said, plans to enter the League of Nations, and is only delaying to decide what manner of entry would leave it the least expending to do as to why it stayed out so long.

A chivalrous desire to help keep peace in Europe is credited to Moscow, no doubt correctly. But there is shrewdness, as well as chivalry in the move. Stalin has troubles enough, without having to keep a watchful eye always on the western front.

In particular he has occasion to focus attention on the far end of his domain, in which quarter Japan is carving out a place for itself in the Oriental sunshine without much regard for what Russia may want. Joining the League would be for Russia the next thing to making a general treaty of inoffensiveness with Europe, and leave the Soviet dictatorate free to pay attention to urgent matters in the Far East.

Japan, undoubtedly, sacrificed a measure of world confidence when it quit the League. Russia would correspondingly gain confidence abroad if it joined the League and thus aspired itself with the proclaimed purposes of that organization—Edmonton Bulletin.

### Machine Reads Minds

Graph Paper Takes Record Of Reactions On Brain

The old story about the walls of Jerry-built houses being so thin that you could hear your neighbor changing his mind seems likely to come very near the truth. A machine invented by Dr. Alexander Cannon records any mental reaction, and consists of flexible tubes which are attached to a human subject. The reactions of the brain are recorded on graph paper. Simple emotions like surprise, love, hate, are recorded, and the machine also registers mental fatigue, the capacity of the mind, reaction to tension or concentration, suicidal tendencies, and whether the subject is telling the truth or lying. Among other things, it shows that waltz music is soothing, and that it relieves asthma by inducing regular breathing. It is also claimed that it proves telepathy to be a physical fact.

### Queen's Voice Over Radio

For the second time in the history of broadcasting the queen's voice will probably be heard on the wireless in September, the occasion being the launching of the Cunarder, No. 534, at Clydebank. Her Majesty having been heard on the wireless in the early days of the British Broadcasting Corporation.

## DR. WILLIAMS' PINK PILLS FOR PALE PEOPLE

In hot weather, stomach disorders and indigestion occur more frequently. Also children may play too hard. Mrs. Mary Nelson, 63, 10th St., St. Paul, Minn., says: "When the children are excited and restless in warm weather I give them Dr. Williams' Pink Pills for Pale People. They are the best for restoring and in the morning they are happy and contented. They relieve cold, summer complaint, single fever and all minor disorders. Price 25¢ package, 75¢ Dr. Williams'."

## BABY'S OWN TABLETS

### Indian Rope Trick A Myth

Occult Committee Says No One Has Ever Seen It

As the result of a solemn inquest held by the Occult committee of the Magic Circle—a group of bona fide scientists—the Indian rope trick today reposes under a headstone officially inscribed "myth".

Nobody, evidence before the committee showed, has ever performed the rope trick—wherein an Indian fakir is supposed to toss a limp rope vertically into the air, whereafter a boy nimbly climbs out of view into the heavens. Nobody could be found who had seen the trick done. So, in effect, the occultists found that neither the rope nor the story will "stand up". The group has offered \$2,500 to anyone who will perform the feat.

Lord Amphil, once viceroy of India, presided over the committee's meeting.

How India was scoured and large rewards were offered futilely for a rope trickster when King George and Queen Mary toured India early in their reign was told by Sidney Clarke, chairman of the Magic Circle.

Even the great Nizam of Hyderabad, with limitless resources, was unable to locate a juggler who could do the rope trick, when asked to provide one for a giant garden party related by his friend, Sir Michael O'Dwyer. In 25 years in India, Sir Michael never found anyone who had seen the trick.

Harry Price, director of the National physical laboratory, said he collected a library of 12,000 books about magic, and not one contained any genuine evidence about the trick.

Sir Francis Griffin, formerly an inspector-general of police in India, once held in the rope trick to the power of suggestion, like the impressionable American lady of travel who said the most remarkable thing he had seen in all India was the sun setting behind the Aga Khan.

### Problem In South Africa

Many Pupils With Scottish Names Speak No English

As in Quebec so in South Africa, there are people with pure Scottish names like Campbell, Fraser and MacDonald, who speak little or no English. Dr. S. H. Bloembergen, Director of Education of the Orange Free State in the Union of South Africa, remarked after an investigation of Quebec school conditions.

Dr. Pellissier went to Quebec to study the question of bilingualism and now he is in Quebec. In South Africa they have the same problem, the majority of the pupils speaking Dutch and the minority English. They also are faced with the difficulty of educating children in the outlying sections, as in Quebec. Dr. Pellissier said the children with the Scottish names are the descendants of settlers who married Boer women. They gave their names to their wives but the mothers passed their own language to their offspring.

W. N. U. 2054

## Takes Census Of Buffalo In Large Area In North, Spending Two Years In Completing Work

Mr. J. D. Soper, Special Investigator for the Department of the Interior, Canada, just recently returned to Ottawa after having spent two years studying wild life conditions in Wood Buffalo Park, which is located four-fifths in northern Alberta and the remainder in the adjoining Northwest Territories. The Honourable Thomas G. Murphy, Minister of the Interior, explained that Mr. Soper's special assignment was a comprehensive study of the buffalo, both the original last remaining herd of wood buffalo and the plains animals transferred there within recent years from the government herd at Buffalo National Park, Wainwright, Alberta.

The difficulty of taking a reasonably accurate census of the buffalo in this immense area of 17,300 square miles of rough wooded country, the maximum dimensions of which are 176 miles by 144, can hardly be appreciated. To give Mr. Soper a good start on his work the department first arranged to have him make a reconnaissance from the air. Later on he travelled by canoe, dog sled and on foot. By these various means Mr. Soper covered more than 8,000 miles within the park. Fortunately he had already had several years' experience in northern travel, having carried out a geographic and faunal survey on southern Baffin Island just prior to the Wood Buffalo Park work.

According to the Honourable Mr. Murphy, until the completion of Mr. Soper's investigation at Wood Buffalo Park the department could only form an opinion as to the number and condition of the buffalo in the park on estimates submitted by wardens and others whose views were usually colored by the prevalence or scarcity of animals in one small area. Even now in giving out figures as to the number of animals the Department of the Interior is careful to say that it is only approximate. The animals move about daily and the changing seasons and one can only observe at one place at a time.

Mr. Murphy said that on the whole Mr. Soper's findings were very satisfactory. It is estimated that the total population of buffalo in the northern park is at the present time in excess of 8,000. The animals from Buffalo National Park at Wainwright seem to have become acclimatized and along with the original herd were found to be in very good condition.

With the information now available the department will be in a better position to determine what is the natural increase of the herd. Already there is a small annual return from the government's investment at Wood Buffalo Park in that a number of selected animals are slaughtered each fall and the meat used for relief purposes in the Fort Smith area.

Although, as pointed out by the minister of the Interior, Mr. Soper's assignment was primarily that of studying the buffalo, his all-round qualifications as a naturalist placed him in the position of being able to observe intelligently and submit a comprehensive report on the wild life of the park. More than two thousand specimens were collected by Mr. Soper and a foundation was laid for a thorough understanding of the wild life of the area with its numerous problems in regard to efficient administration.

Extensive observations in topography and forest growth were carried out. Astronomic observations were taken for position in ground control in relation to the area map of the park. A thorough inspection was carried out pertaining to parks, roads, trails, telephone lines, cabins and live towers. Streams and lakes were travelled, where possible, throughout the area to secure full information on the possibility of boat and canoe transport along the highways and within the park. The water-fowl situation was investigated to ascertain its abundance and how it was distributed among the lakes and waterways of the park.

The minister said that the total of Mr. Soper's reports would make readily available a large amount of information for administrative purposes.

It is understood that Mr. Soper's next duties will be those of Chief Federal Migratory Bird Officer for the prairie provinces, a position which through training he is specially well qualified to fill.

### Farm Well Waters

#### Free Testing Service Maintained By Dominion Chemistry Division

Among the many utilities carried out by the Dominion Department of Agriculture there is a voluntary service which deeply concerns the health and welfare of the farm home. This is the examination of farm well waters which is executed free of charge by the Dominion Chemistry Division, provided the directions for collection and shipment of the sample are carefully adhered to and the express charges on the sample prepaid. Dirty water, water offensive to sight, taste, and smell, carries its own condemnation, but there are other farm well waters which are clear, bright, and odorless and yet far from being safe and wholesome. The presence of sewage from sources of contamination does not always reveal itself without the aid of chemistry and bacteriology. Therein lies the danger of concluding that a water without a bad taste or offensive smell is necessarily a good water. If there is the slightest reason to suspect the purity of the water supply, there should be no delay in having it tested. Directions for examination may be obtained on application from the Division of Chemistry, Experimental Farm, Ottawa.

### Right Kind Of Shoes

#### Small Foot Has Lots To Do With Proper Fitting

Since a Canadian doctor has attained famed specialization in the treatment of disease by direct manipulation of the bones of the feet, much more attention is being paid by the medical fraternity to the functions of these extremities.

The dean of the medical school at Rochester, N.Y., dealt with this subject in detail at the meeting of the American Medical Association at Cleveland recently. He indicated that the small toe largely dictated whether shoes were a proper fit and asserted that in walking the weight of the body was transferred from the heel to the small toe before it was eventually distributed to the large toe. If the shoes were failed to permit of this triangular action there would be eventually foot trouble of some kind and later on other parts of the body would suffer in consequence.

By Ruth Rogers

309

SMALL! COOL! FOR TOWN OR COUNTRY FOR ALMOST ANY INFORMAL OCCASION. DETACHABLE CAPE!

It's so smartly styled. It has a detachable cape. It buttons to the dress, holding it securely in place. A low neckline arrangement of the skirt has inverted plait to swish the hem of this smart, simple straight-line dress.

You can choose cool cottons, sheers, lively washable summer creases, linens, etc.

The dress is snappy for sports carried out in shirting cottons, pique, plaided or striped peasant cotton weaves, horse blanket checks in flares, etc.

Style No. 309 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust.

Size 16 requires 3 yards of 29-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Contrary To Popular Opinion, It Seems That Wheat Plays Minor Part In Agricultural Production

### When Nature Steps In

#### Figures For Field Crops Are Lowest Since Records Were Kept

The wheat agreement, signed last August, was one of the wonders of the postwar world; an international conference had achieved something. The Canadian, United States and Argentine delegates were all for it. Nothing seemed more reasonable to them than that exports should be curtailed and production cut 15 per cent. Premier Bennett, Canada's delegate, was as enthusiastic as the others. But not until United States Secretary of Agriculture Wallace threatened to pour grain into the East, Australia's sales territory, did the postwar dominion sign on the dotted line.

The situation at that time was unexampled. The world had the greatest store of grain in history running to nearly a billion bushels. When supply exceeds demand prices fall. And it meant a great deal to the wheat-producing countries of the world that, by curtailing the supply, they should get more for their product. More money for the farmers meant more money for the people generally, as cash received for the grain went into circulation.

Since then Nature has taken a hand. A severe winter and drought have done still more to curtail production. The United States federal crops reporting board, on the basis of conditions on June 1, predicts the shortest wheat crop in that country since 1893. The Dominion Bureau of Statistics' figures for field crops, on May 31, were the lowest in the twenty-six years during which records have been kept. Compared with last year, Canadian figures for fall wheat are down from 95 to 45, and for spring wheat from 99 to 79. Ontario has the poorest crop prospects on record.

Russia and the Danubian countries were also parties to the wheat agreement of a year ago. Russia, while she agreed to restrict exports, did not agree to any figure; she merely said she would do her best. There were famine conditions in Russia then. Now crops conditions in Soviet are good in some parts, bad in others. The smaller average sown and unfavorable crop conditions are likely to reduce the yield in the Danubian basin. What was desired last August, when the international conference on wheat met, is now being accomplished. Though Argentina's default could morally be condoned, its economic effects may be slight. Higher prices for wheat are indicated. Hamilton Spectator.

Menhaden are small fish of the herring family, very valuable for their oil.

Because of the high quality of Canadian wheat, which has given it much publicity at international exhibitions, and the large part which Canada takes in supplying the world's markets with the "staff of life," it may be supposed that wheat is almost the only important farm product in Canada. The statistician of one of the Canadian banks has recently assembled figures which show that wheat, after all, plays only a minor part in Canada's total agricultural production. Fewer than half the farmers of Canada engage in wheat-raising at all, and from 1925 to 1929 wheat accounted for only about 22 per cent. of the total agricultural revenue; in 1933 the proportion was only about 16 per cent.

Among other farm products of importance it may be noted that farm animals including hogs are credited with about 11 per cent. of the total farm revenue; dairy products and poultry about 22 per cent. Field crops aside from wheat which play an important part in the total include oats, \$75,000,000; barley, \$16,500,000; potatoes, \$3,543,000; turnips, \$11,875,000; hay and clover, \$94,000,000; alfalfa, \$13,334,000; grain hay, \$19,400,000; and mixed grains, \$12,750,000. Commercial fruits amount to about \$10,000,000.

Other crops which do not run into such large figures are still important factors in the country's agricultural income. The products of the maple tree—sugar and syrup—average about 3 million a year. Honey in 1932 amounted to 1 1/2 million; sugar beets contribute another 3 millions. Vegetables and vegetable plants from greenhouses and hot-houses amount to eight millions, and flowers account for 4 1/2 million. The value of the tobacco crop last year was \$5,300,000. Production of fur runs to 10 millions, of which about 30 per cent. is from fur skins. Wool accounts for two millions.

### No End To Inventions

#### Some Are Very Practical And Others Quite Worthless

American inventors are a motley and cosmopolitan crew, a visit to the National Inventors' Congress at Omaha, Nebraska, disclosed. Neither age nor previous condition of servitude seems to have any bearing on the makeup of the men and women who are inventing things. Whites, Negroes and Chinese were included in those entering gadgets at the congress.

Most of the things exhibited are extremely practical. Others are worthless. But in the eye of the proud originator every one is just what the world is crying for.

"Everything has by no means been invented yet," said Albert G. Thurston, national president of the Congress. "A world which only recently has been freed from underwear that binds and scratches is not too convinced that inventors are a truly resourceful lot."

Fortunately Nature suggested other items to mankind, including: A gadget that will whistle when a person has taken about too much food or drink; a needless slunk shiner; waterless dishwasher, and numerous others.

### Origin Of Human Mind

#### Professor Traces It From Spinal Cord Of A Fish

New York's American Museum of Natural History traces the origin of the human mind. Prof. D. M. S. Watson of the University of London tells his audience this ingenious human mind originated in the organ of smell of certain first living marine creatures. The mentality of man, ape and all the creatures is traced back down the evolutionary highway to a modest knot at the upper end of the spinal cord of a fish. The reported development took ages. And this fish mind seems to have moved slowly at that. Only one explanation seems consistent with the broad facts. This fish mind must not be that true mind among men which at times undoubtedly does reflect the infinite. Christian Science Monitor.

### WILLINGTON FAMILY HAS JOYOUS REUNION IN LONDON

Lord Willington, Viceroy of India, who is in England on a well-earned vacation, travelled to Croydon recently with Lady Willington to meet his son and bride who flew from the continent. In the group, reading left to right, are Lady Batendone (who was Miss Mary Foster), Lord Willington, Sir Samuel Hoare, British Secretary of State for India, Lady Willington, and Lord Batendone (Willington's son).

**Gasoline Tax**

An increase of 25 per cent. in four years in the average of gasoline taxes paid by motorists in Canada is recorded in figures of the Dominion Bureau of Statistics for 1933 just released.

From 1930 to 1932, the average tax in Canada was 5.44 cents per gallon. This year the average is 6.77 cents per gallon which equals approximately one quarter of the selling price of popular grades in various sections of the Dominion.

Taking a three-year average from the bureau's last official figures covering the total selling value of new cars produced in Canada, at the works, for the period 1930-32, the last available, the average per annum totals \$61,097,512. In the same three-year period motorists (ten per cent of the population) have paid out annually an average of \$44,720,707 in gas taxes and licenses, or the equivalent of 70 per cent of the former figure every year.

At the same time, while the gasoline tax has increased by 25 per cent, the selling value of cars at the works has dropped from \$91,776,806 in 1930 to \$38,569,796 and gasoline consumption has declined from over 600 million gallons in 1929 to 484,523,000 gallons in 1933.

Study of the bureau's figures show a trend to decline in the consumption of gasoline almost simultaneously with the increase in the taxation of this product which, originally, was imposed to pay for highways but which, now, in most provinces, is being absorbed into revenue to be used for general purposes.

Alarmed at the persistent increase in the taxation, motor executives throughout Canada are indicating to their respective governments that some alleviation will inevitably lead to the more extensive use of automobiles and that this will react to the benefit of provincial treasuries.

### Navy League Does Valuable National Service

Rallying to support the Navy League of Canada in its work of assisting widows and orphans of men of the Merchant Marine Service, Didsbury citizens subscribed \$14.00 to this cause in a recent campaign here conducted by Fred Cooke, organizer of the Alberta Division.

Further contributions may be sent to Fred Cooke, 1107, 15th Avenue West, Calgary, Alberta.

**Cutting Alfalfa for Seed**

The growing of alfalfa is receiving more attention in different parts of the prairie provinces and some growers are attempting to secure from their own crop, when possible, seed for their own use.

The handling of the seed crop where no special equipment is available is not in itself difficult as quite good results may be obtained with the ordinary equipment found on prairie farms. The main difficulty lies in the fact that alfalfa produces seed in rather erratic fashion. A hot dry season provides the most satisfactory climatic conditions for seed production. At the Dominion Experimental Farm at Indian Head, in 1933, the early part of the summer particularly favored vigorous plant growth with the result that alfalfa set no seed worth while in the first crop. The second crop, however, grown under drier conditions set seed in abundance but of course this was too late to mature under average prairie conditions. Generally in most parts of the prairie provinces if the first crop does not set seed in a satisfactory manner no mature seed will be obtained that season.

Alfalfa is fit to cut for seed when about three-fourths of the pods have turned brown but often this condition is not obtained much before fall frosts occur. The ripe seed will not be injured by the frost and the immature seed is useless anyway. Cutting is probably best done with the grain binder, making the sheaves small and stacking as with grain.

The threshing may be done with the ordinary grain separator putting in all the concaves and screwing them down. Gauge the wind so that the unthreshed pods will not go past the tailings auger. These will leave the machine through the grain spout and must be returned to the cylinder until threshed. The threshed seed will leave the machine through the weed seed opening. For good results the alfalfa must be dry and should be fed into the machine slowly. The threshed seed will contain broken pods and other matter but these can be removed with the fanning mill. The threshing and cleaning require careful and intelligent handling to give satisfactory results. Small lots of alfalfa seed may be cut with a scythe and when thoroughly dry threshed with a flail.

## "DON'T."

By L. J. W. Didsbury.

When things go haywire out on the

farm,

Don't growl, old man, don't growl;

and country life loses some of its

charm.

Don't spoil the day with a howl.

Swear if you must—although 'tis

wrong;

Better the laugh and the cheerful

song;

The tide will turn—it won't seem

long

If you whistle instead of growl.

If the eggs go bad 'neath the setting

hen,

Don't storm, old lady, don't storm;

Forget about it and sether again—

This time she'll keep them warm.

Chicks are freshish' comical birds;

In flocks they travel, but never

in herds,

And can't be hatched from angry

words—

So take my advice, don't storm.

If some fine morning you lose your job,

Don't whine, young man, don't

whine;

Fetch out the grin instead of the sob—

Pretend that it suits you fine.

Tell the old man he can go to—

Then marry his daughter so pretty

and swell.

And start up in business against him

as well—

Men never were made to whine.

When some girl-friend has stolen your

beau,

Don't cry, little sweetie, don't cry;

Just say, "Aw heck!" and let him go—

Don't let it moisten your eye;

Then step right out with your head

held high,

Plug up the tears and muffle the

sigh,

And get you a better, handsomer

guy.

But please, oh please, don't cry!

## Westerdale Notes

Too Late for Last Week.

The Young People's Association  
of Westerdale, held their annual  
Sports Day on July 29th, with a  
record crowd. The weather, though  
quite warm, was ideal, and the  
picnic went over with a bang.

Meivin girls softball team played  
and lost to Harman. Westerdale  
and Hainstock Juniors played with  
Hainstock winning. Eagle Hill  
senior hardball team played against  
Westerdale winning 11 to 8. Hain-  
stock played Harman, Hainstock

winning. Eagle Hill played Hain-  
stock and lost. Hainstock winning  
the prize of ten dollars. There were  
noses for the children. Mrs. Frank  
Jackson won the ladies first prize of

250 rounds of 22 Cartridges in the  
shooting gallery. Mrs. Harry Jack-  
son won second prize of 50c. Ralph  
Jackson won 250 - 22 cartridges in

men's 1st prize, man from Harman  
won 2nd. Eagle Hill re-  
sulted in a tie. Westerdale

winning with a score of 11-8.  
Hainstock beat Harman 5 to 6.  
Hainstock beat Eagle Hill 9 to 15

and won the ten dollar prize. The  
booth and refreshments were con-  
ducted by the Ladies. A total of

eighty-one dollars were realized from  
the booth and the barn dance at Walter  
Herbert's place.

Westerdale Seniors played Harman  
in the League finals on July 28th  
on the Westerdale diamond. But

darkness hindered the finish so the  
teams withdrew and finished on the  
Harman diamond on the 29th, the  
game ending 14-10 in favor of

Harman. Westerdale played Harman  
second game in first  
playoff on Westerdale diamond on

August 1st, with a score 6-7 in favor  
of Westerdale.

Born in the Didsbury hospital on  
July 31st to Mr. and Mrs. Charley  
Gale, a son. Mr. and Mrs. Gale  
are now residents to the community

and to reside on one of the John Balke  
places.

**BERGEN-NICHE VALLEY**  
Don't forget the Picnic to be  
held at Bergen Community Hall on  
on August 20. Baseball and Sports.  
Bring your lunch and enjoy your-  
self. Dance at night.

There will be a Social Credit  
meeting held in the Bergen Com-  
munity Hall, Saturday night, Aug.  
11th.

## Bureau Of Research Suggested

Ottoman Member Lays Plan Before B.C. Government

Creation of a provincial research institute for scientific investigation of modern and by product trends in all industry, and more particularly to develop outlets for the basic primary products of British Columbia, is being suggested to the provincial government at Victoria, B.C., by Dr. J. Allen Harris, M.L.A., South Okanagan, himself a research chemist.

Dr. Harris suggests that a modest start be made with the plan, to supplement what already is being done in the way of scientific research in B.C. industry. In accommodation at the University of British Columbia, without the expense of new building, he proposes that the province launch the nucleus of a provincial research institute, which would be wholly apart from student activities at the university.

Started in just such a way, the Mellon Institute in the United States was quickly subsidized by private industries, and has since proved of supreme importance to the business life of that country.

## Little Journeys In Science

PYRETHRUM

(By Gordon H. Guest, M.A.)

The story of how a young German scientist discovered a valuable insecticide is most interesting. In far away Japan, in the 17th century, a Japanese nobleman's daughter was being married, and to this celebration was invited a young German scientist.

It was the usual Japanese custom of those days to decorate each room entirely with one kind of flower or blossom. In one room the young scientist observed that no insects were flying around, and that the floor was strewn with dead flies, ants and other typical summer pests. This room was decorated with a flower, somewhat like our ordinary field daisy. The young German found that this flower was known as the pyrethrum and that it grew in abundance on local soil.

Permission was obtained to take a few of these flowers to his laboratory. After many experiments with pyrethrum and similar flowers, he discovered that the scent given off by them killed insects and other creeping pests but was harmless to humans. His discovery has been of great value to all nations in the everlasting war against insect pests. Today this little "field daisy" is widely cultivated in Japan, and its thin, compressed and powdery leaves are adapted to all parts of the world to be used in the manufacture of insect powder, which is most effective in the home.

## Praise For Canadian Nurses

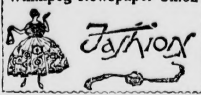

Have High Reputation In Britain And Are Well Known

A tribute was paid to Canadian nurses by Miss Edith Rome, interviewed at Montreal on her way to attend the Canadian Nursing Association convention in Toronto. Miss Rome, noted that Canadian nurses have a high reputation in Britain, where they have become known through the constantly increasing interchange of nurses.

The standards of nursing in Canada and Britain, Miss Rome remarked, are much higher than those of some countries of Europe, where nursing is a very new thing as yet.

The proposed founding of a Florence Nightingale scholarship was referred to by Miss Rome, who expressed the hope that some Canadian nurses would compete for and win it.

PRETTY HOME, FROCK THAT'S EASY TO SLIP INTO—IT OPENS OUT FLAT FOR IRONING

You couldn't ask for anything easier to fashion than to-day's pretty home frock.

Delightfully cool and lovely for such a model is daintily printed with crisp white organdie as the original.

Have the ruffling finished professionally with pivot edge, or you can cut it by hand or stitch it on the machine.

A gay seersucker in checks or stripes is an excellent medium. Trim it with white piping.

Cotton voile prints, crinkled crepe prints, batiste and handkerchief hem prints, are other lovely cool suggestions for this charming model.

Style No. 331 is designed for sizes 16, 18 years, 20, 22, 24 and 26 inches bust. Size 36 requires 3 1/2 yards of 29-inch material with 1/2 yard of 39-inch contrasting.

Price of pattern 20 cents in stamps or cash, cash is preferred. Wrap can cut out.

## Heat Energy In Straw

Process For Storing Gases Being Studied By Scientists

A hint that we are overlooking the existence of an immense supply of energy in some of the waste products from farms, is revived by C. H. Bailey, a scientist at the University of Minnesota, who addressed an organization of flour millers and cereal chemists at Toronto recently.

Mr. Bailey made the statement that chaff and straw in Canada and the United States was capable of producing more heat than all the anthracite coal produced in the United States during a year.

There have been numerous experiments in Western Canada in efforts to utilize the straw resulting from the annual harvest. Several times it was said that a process for storing gases from burning straw had been perfected, but this proved incorrect and so far as is generally known the tremendous quantities of wheat straw in Western Canada and the United States are still a total loss and have to be got rid of by a wasteful process of burning in the fields.

The chemists recognize that heat is a potential source of power. Millions of tons of wheat straw are annually consigned to the flames in the agricultural areas of Western Canada and the United States. If the energy thus liberated could be stored in some way the country would be possessed of enormous reserves of power to do essential work. To-day science is very alert in the study of these problems. It may be that one of these days this problem will be solved and a new source of revenue will be provided for the western farmers, who are badly in need of such a benefaction.

## Animals Have Vocabulary

Phrase "Our Dumb Friends" Was Always A Lie

The average man or woman who likes animals and is convinced that his or her pet understands a half dozen familiar commands may be surprised to learn that several "animal dictionaries" have been written.

Gabriele D'Annunzio, the Italian poet, has announced that he will include a complete glossary of the canine language in his new book, "Lives of Illustrious Dogs." The book is to be modeled after "Mutters' Lives".

Other animals whose vocabularies have been recorded, are the monkey, the horse, and the cat. An American woman, Miss Blanche W. Leavitt, was responsible for classifying 32 terms of the chimpanzee, together with the meaning of each, when she was in the Congo. Other scientists have tabulated 12 words of the Marmoset language and 14 of the Gibbon's.

The horse is said to speak with "six words and three kinds of intonation." Cats produce 15 sounds, according to the experts, each with its distinct interpretation. There are 12 "words" in the hen's vocabulary and five in the rooster's.

From all this it seems that it is high time that the phrase "our dumb friends" went into discard. It was always a lie!

## Japan's New Submarine

The Japanese Navy's new submarine, the I-76, has been launched. The new vessel has a displacement of 1,625 tons. Its engines of 6,000 horsepower will propel it at a surface speed of nineteen knots. Before the launching of the I-76 Japan's submarine tonnage was given as 72,294, well over the 52,700 ton limit imposed by the London naval treaty.

About 2,000,000 tons of water pass over Niagara Falls every minute.

## Agricultural Notes

Many Items Of Interest To The Western Farmer

The Canada thistle is not native to Canada. It was introduced originally from Europe.

All forms of nitrogenous manure increase the growth of grass at the expense of clover.

Nitrogen, while stimulating plant growth, soon loses its power unless fortified sufficiently with phosphorus and potash, particularly the former.

Losses of fertility from farm manures may be prevented by the use of litter, watertight floors, covered manure pits, and by getting the manure into the land as quickly as possible.

In relation to grassland, its creation, management, and fertilization, efficient and highly systematized research has done much during the past few years to add to human knowledge and to the profits on the pastoralist.

The use of seaweed as a fertilizer dates back to historic times, and its value for the upkeep of soil fertility has been generally and practically recognized both in the old world and in the new by farmers residing not too far distant from the coast line.

One hundred and eleven pounds of bromine grass seed and four pounds of rhubarb seed from the British Isles, and 122 pounds of dax and seven pounds of rhubarb seed from the United States were imported into Canada during the year ended June 1, 1934.

Sheep help to suppress the wild carnal in pasture lands. This weed is best kept in check by the regular rotation of crops with thorough cultivation. It is spreading in the clover seed producing districts of Ontario, and is a nuisance along roadsides, waste places and old meadows.

Agricultural research has demonstrated that young herbage, besides being a rich storehouse of proteins, sugars, starches, and essential minerals, contains carotene which, the body of an animal produces vitamin A. This vitamin promotes growth in farm stock as well as in human beings, and enables them to resist disease.

I know precisely that for either object, whether to bring the weeds and clutch grass to the surface and to wither them by scorching heat, or to expose the earth itself to the sun's baking rays, there can be nothing better than to plough the sod up with a pair of oxen during midday in summer. Norophon in his book "The Economist," 434-355 B.C.

There is, finally, one form of economy which is essential to the rapid, confident, and accurate extension of scientific research, and so, especially to industrial prosperity, based upon its practical application, and that is sympathetic cooperation and loyal teamwork between research workers themselves, whether they belong to the same or different institutions or organizations. David H. Bates.

## IN UP-TO-DATE STABLES

—Old Reliable Minard's—

When horses come in to be stable with wire-cloth or saddle-balls, or even have caked with mud, get the Minard's horse stable at once, as Mr. David H. Bates, Manitoba, knows. He writes:

"I have Minard's Litter. Like to have it in the house. I have found your Minard's Litterman especially good for hauled wire side on horses."

A female doctor treated Minard's Litterman with a special recipe. It was very stable and very happy.

## NIT COLOR STAYS IN

New you can color lingerie, skirts, hats, covers, etc., and know that the color will STAY. The new Instant Rit works in the color. That's why you never have streaks and spots and why Rit colors last and last and last—32 Colors.

## YOU'VE BETTER LOOK WITH

## OCCASIONAL WIFE

By EDNA ROBB WEBSTER  
Author of "Joretta," "Lipstick Girl" Etc.

## SYNOPSIS

Camilla, Hoyt, and Peter Anson, young and in love, marry secretly, desiring to live their own lives apart until Peter is able to provide for them. Peter is a young struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is looking for an agency job. Others in the story are Axis Werth, another wealthy girl who is striving to win Peter, Sylvia Todd, Peter's model and friend, and Mrs. Harker, Peter's mother. After a party at an exclusive club where the rest of the members of the party are a cabaret to entertain the guests, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Axis and another boy are standing over them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Axis Werth calls and persuades Peter to accept a loan of \$1,000. Peter fishes his exhibit and asks Axis for Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Axis "Inspiration." Peter adopts the latter title and Camilla, heartbroken to piece, Peter's studio for quiet and to think. Peter and Axis follow later, and as the lights are turned on, the statue has been shattered to pieces. Axis accuses Camilla of doing this, and Camilla, stunned by the denials, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he has sculptured especially for her as a wedding gift. They named it "Land of Hope."

(Now Go On With The Story)

## CHAPTER LI

Axis managed to visit the exhibit alone with John Danforth on the day before the final vote would be cast for the winner of the Paris scholarship. She had made the coincidence seem casual enough. And her interest in the exhibit had her niece's unqualified approval from the beginning. His own sons and only daughter had evinced none of his esthetic appreciation, which was one of the few disappointments of his life. So when his niece not only patronized the profession, but actually won her degree at National, he was immensely proud, and sympathetic with her plans and interests.

So generous was his measure of approval that he had purchased one of her best paintings and hung it in

his library, though he had to admit to himself that she couldn't have sold it elsewhere for a song. But he advocated that praise stimulates effort and encourages ambition.

He was particularly noted for his philanthropy to talent, and not a small part of the Paris scholarship fund was responsible to his generosity; but he never permitted his left hand to suspect what kept his right hand so busily employed.

"The judges have no easy task. I can tell you that," he confided to Axis at the exhibit. "It was difficult even to eliminate the entries."

"Do only beauty and perfection of detail enter into the consideration?" she asked seriously.

"Oh no, there are many points to be considered."

"Such as—"

"Subject matter, position, execution of material."

"Does the thought behind the object, the reason for the creation, its originality, mean anything?"

"Indeed, it means a very great deal. Is there a piece here in which you vision a purpose, a story?"

"Oh, yes, a splendid one. Uncle John. Stand just here and look at that group over there, third from the end. Doesn't it tell you a dramatic story?"

"Yes. I remember it well in the original selection. There was no question about entering it. I recall. Undoubtedly, it is one of the best. But there are so many among the best."

"But what other one tells so poignant a story of life?" she insisted.

"There is the seagull—beautiful, but—just a seagull; a splendid likeness of Andrew Havelock after all, just the portrait of a man; those muds!"

"I don't know," she replied. "Love, about which there is nothing individual; the boy on a hill in a storm, the modernistic conception of 'The Kiss'—but who would want a kiss like that?" she smiled.

"I suspect," he looked at her sideways, "that you are campaigning for a vote for that young man of yours."

"Only because he deserves it," Axis defended.

"I don't doubt that," he agreed, readily. "Well, my dear, if it will relieve your anxiety and you will keep the secret to yourself, he already and my vote from the beginning. I might say that my opinion could have wavered between that and the Havelock portrait, but since there had to be some dividing factor, your interest in Peter Anson might as well be it. I see nothing unethical about that. It is merely a matter of matching points, and, as you say, the vision and the story behind that group of immigrants should be favored. But don't hope too much. My vote is only one of seven, you know."

She hugged his arm affectionately. "One of seven is better than none. I am glad to know that Peter will have one vote, anyway. That will draw attention to his work, at least. And you might be able to influence a good sale for him," she suggested, coyly.

"Perhaps I can," he agreed, with an amused smile.

Meanwhile, the results on Camilla's work were progressing rapidly. Wheatheart Cereal sales had doubled within a fortnight, production was speeded up, the company was one of the few in the city calling back its former employees. Negotiations were being made with a national radio network to broadcast a Tiny Tot series for a children's half-hour program. Consultations, plans, discussions, were in order.

Camilla was the central figure. Her brain whirled with the exhilaration of so much attention and approbation, even while it functioned calmly and clearly with the execution of her plans.

Finally, it was decided that she should prepare the stories, being the only person familiar with the characteristics and activities of her diminutive people. Her salary would be doubled and an additional sum paid for each story. These would be comparatively easy for her to produce, because they would follow the same action as appeared in the advertisements. The work would involve only a little more time, which she could now spare from her drawing board, and her remuneration would be doubled thereby.

Then, the most astonishing development of all was presented to

her. The radio manager insisted that the obvious person to present the Tiny Tots, by air, to her juvenile audience, was the author herself, Camilla Anson.

Camilla protested, overwhelmed by the possibility. "But I can't do everything," she objected, bewildered. "How can I do ad copy, write manuscripts and broadcast two days each week?"

"It is a pretty large order, but you can do it," the advertising manager encouraged. "You can hire a secretary to attend to everything except your most personal work, and the broadcasting after the first few experiences will become very natural to you. We can arrange for the national book-up from here instead of from the New York studio."

So it was arranged, and Camilla returned to her apartment that evening so thrilled and bewildered and dejected that she couldn't decide whether to laugh or cry. She summoned Peter and, secure in his arms, tried each outlet of her emotions.

He held her against his breast, believing that his ears heard; that his Camilla had become a national figure in her field, almost over night. He had recognized her talent from the beginning, but to have the world recognize her so quickly was a revelation and an enigma.

"Why, precious?" he exclaimed, holding her off to gaze into her flushed face. "I shan't be able to afford a wife like you any longer."

"Peter, don't say that!" she laughed happily. "None of it would be my good at all, without you. And if you don't want me to do it, I won't."

"You mean that?" incredulous. She met his eyes bravely. "I do, Peter."

He drew her again into his embrace. "My darling, how could I deny you the right to take such an opportunity when I can't take care of you? Some day perhaps your arms relaxed about her and his words became impatient. "Oh, I don't know. I've always talked about what I am going to do, while you have kept quiet and done it."

That old expression of haunting doubt and chagrin clouded his face and the monster of jealousy gripped insidiously at his heart. He tried valiantly to shake it off, but its hold was tenacious. He sank into a chair, listlessly.

Camilla was on her knees beside him, instantly, as if she had leaped a widening chasm in desperation. Her arms clung to him. "Peter, dear Peter, tell me you don't want me to go on with this! Tell me the truth!" she pleaded. "I want to do just what you wish for me, what your love will let me do. I don't want to obey anyone or have anything except you and your love."

He was instantly contrite, tender. "Why, if I could plan your life for you, I couldn't wish it to be more perfect. You don't think I'd be a dog in the manger, do you?" he demanded, with a tremendous attempt at mirth. "I guess I'm just so proud of you and glad for you that I don't know how to act—don't know what I'm doing."

"Are you sure?" anxiously. "Why, of course. Tell you what, every day you broadcast, I'll tune in and get more inspiration from hearing your voice while it speaks to the whole nation than I could

get a dozen other ways. I'll say to myself, 'That's your wife, you unworthy pup. She did that all by herself and in no time. Get yourself to work and deserve her!'

With such gay jesting and repeated assurances, he convinced her of his approval, with this reservation: "Of course, if that day ever comes when I can match your salary, Mrs. Anson, you will be expected to meet the terms of our original agreement."

"That day can't be too soon for me," she declared, earnestly.

(To Be Continued.)

## Manchurian Army

Japanese Officials Find They Have More Soldiers Than They Need

The problem of what to do about the Manchurian army, now in the uniform of the state of Manchoukuo, is disturbing the Japanese advisers and administrators of the new government.

In the days of Chinese domination an army of more than 200,000 was maintained. This huge force used up more than 80 per cent of the budget, and in addition unpaid soldiers and regional commanders levied special taxes, seized food supplies without paying for them, and paid nothing for billets.

To-day the army of Manchoukuo numbers about 125,000 men, and uses up a little more than 39 per cent of the budget.

In addition there are more than 50,000 Japanese soldiers in Manchuria, paid and maintained by the Japanese empire.

Originally the Japanese high command in Manchoukuo figured that the Manchoukuo army need not exceed 35,000 to 40,000 men, but the question now is what to do with the extra 85,000 to 90,000 unwanted Manchoukuo soldiers. If they are disbanded, as some have been, they return to bandits. Kept in uniforms and barracks, and subjected to training and discipline, they become restless and a danger. They frequently mutiny. When sent on anti-bandit campaigns they refuse to fight unless in troops, squad for squad, with Japanese soldiers.

They are restless and a danger. They frequently mutiny. When sent on anti-bandit campaigns they refuse to fight unless in troops, squad for squad, with Japanese soldiers.

## CAN'T SLIP OR SLIDE FALSE TEETH

Don't use any old kind of remedy to keep false teeth in place—use a reliable, recognized one which dentists prescribe such as Dr. Warrant's Powder—the largest seller in the world—gives teeth so secure yet comfortable they feel natural. Positively no slipping or clicking—gives a special comfort cushion to protect and soothe gums. No colored, gummy paste keeps mouth sanitary—breath pleasant. Inexpensive—all drugstores.

## Little Helps For This Week

"If ye fulfill the royal law according to the scriptures, Thou shalt love thy neighbor as thyself, ye do well." James 2:8.

Some children let us go. We travel hand in hand. Each in his brother finds his joy. In this world stranger land. The strange he quick to raise. The weaker when they fall. Let love and peace and patience bloom.

In ready help for all. It is a sad weakness in us after all, that the thought of a man's death hallows him anew to us, as if we were not sacred too, as if it were a light thing to fail in love and reverence to the brother who has to climb the whole toilsome steep with us, and all our tears and tenderness were due to the one who is spared that hard journey—George Eliot.

Would we codify the laws that should reign in households, and whose daily transgression annoys us and degrades our household life, we must learn every day to adorn it with sacrifices. Good manners are made up of petty sacrifices. Temperance, courage, love, are made up of the same jewels. Listen to every prompting of honor—R. W. Emerson.

Would we codify the laws that should reign in households, and whose daily transgression annoys us and degrades our household life, we must learn every day to adorn it with sacrifices. Good manners are made up of petty sacrifices. Temperance, courage, love, are made up of the same jewels. Listen to every prompting of honor—R. W. Emerson.

It is a sad weakness in us after all, that the thought of a man's death hallows him anew to us, as if we were not sacred too, as if it were a light thing to fail in love and reverence to the brother who has to climb the whole toilsome steep with us, and all our tears and tenderness were due to the one who is spared that hard journey—George Eliot.

## Rural Telephones.

Subscribers West of Town Hold Meeting.

A very representative meeting of telephone subscribers of all lines west of Didsbury was held in the Melvin school on Monday evening. Mr. J. L. Chandler was in the chair and Mr. J. B. Worthington acted as secretary.

Mr. Higgs of Calgary, in a most clear manner explained the situation, and after considerable discussion it was decided to appoint one on each circuit to obtain the views of other subscribers.

There is a possibility of a mutual company being appointed to take over the rural lines from the government. These delegates will meet shortly to consider the situation and what steps to be taken next.

## EVANGELICAL NOTES

The sermon subject at the Evangelical Church service next Sunday morning will be entitled, "A Fool for Jesus' Sake."

## NOTICE

## Melvin Notes

Miss Laura Johnston is spending a few days with Mrs. Morton.

Mr. E. McComb of Calgary called on Mr. Chas. Youngs on Tuesday.

Mr. and Mrs. Pemberton and son Morris of Calgary spent Sunday with Mr. and Mrs. Chas. Youngs.

Miss Jeanette Windsor of High River is spending her holidays with Miss Gladys Carlson.

Miss Kenderdine and Miss Wilson of Saskatoon called on Mrs. John Clarke on Saturday.

Miss Helen Moon of Didsbury is visiting with Mr. and Mrs. Emil Krebs.

Mr. and Mrs. Angus Krebs, and Mr. Chas. Foss spent a few days at Banff last week.

Our school is being renovated this week for the opening on September 4th.

Recent guests of Mr. and Mrs. Peter Johnston were, Mr. and Mrs. A. J. and Mr. and Mrs. Schultz from south of town.

Mr. and Mrs. Esker of Torrington spent Sunday with Mr. and Mrs. Lloyd Chandler, Mrs. Chandler and their little daughter returned with them for a few days.

There was a large crowd at the telephone meeting at Melvin School Monday, August 6, a great interest being shown by the west people.

Congratulations and best wishes are extended to Mr. and Mrs. George Little, (nee Florence O'Brien), Miss Dorothy Youngs, attended the wedding in Vancouver.

The softball tournament and picnic on Wednesday was well patronised, everyone seemed to enjoy the afternoon. Didsbury won the first prize and the Go-Getters the second.

Mr. John Clarke returned from Nova Scotia last week and was very much pleased to see Alberta looking so good after coming through the dry areas of Saskatchewan and Manitoba.

## Mountain View Notes

The dance at Community Hall which was sponsored by the Mountain View W.I. in aid of the Didsbury General Hospital proved a decided success and the members wish to thank all who helped.

Of interest to some late residents of Spring Bank is the marriage on August 8th of Mr. James Gordon MacPherson and Miss Viola Graham Kinney second daughter of Mr. and Mrs. W. Kinney of Calgary.

## LOCAL & GENERAL

Miss Margaret Geiger was a Red Deer visitor last Sunday.

Mr. W. A. Austin was a Calgary visitor Tuesday.

Mr. and Mrs. C. R. Ford are spending the week at Sylvan Lake.

Mr. Al Russell was a visitor in town for a few days this week.

Mrs. Beatrice Briggs of Regina is visiting for a few weeks with her sister Mrs. Ivan Weber.

Mrs. J. E. Hugel and daughters returned early this week from their vacation spent at Sylvan Lake.

Mr. James Ruby was in town Monday saying hello to his many friends here.

Mr. H. Lynch-Stanton is home again after holidaying with his parents at Lundbreck, Alberta.

Mr. and Mrs. B. T. Parker and sons spent the past week holidaying at Sylvan Lake.

Mr. Gene Axtell spent the week-end visiting at the home of his parents in the Clearwater district.

Mr. and Mrs. Dunlop and son Donald spent the past weekend at Pine Lake.

Good quality visiting pads of first class paper—140 sheets per pad 25c—Pioneer Office.

Dance at Grand Centre School (tomorrow night (Friday) in aid of St. Cyprian's W. A. 50c per couple. Good music. (321e)

Piano Tuning De Luxe—Gavin Spence and W. H. Norton are coming this week. Leave orders at Pioneer Office.

Mr. and Mrs. Win. Robertson and family and Mr. and Miss Ferguson have been visiting Mr. and Mrs. Aard Orde.

Postmaster Morgan returned home Monday from attending the Postmasters' conventions of both Manitoba and Saskatchewan.

Mr. and Mrs. Ward Keith and sons, Murray and Bobbie, of Sylvan Lake were Sunday visitors at the home of Mr. and Mrs. H. Hawkes.

Mr. and Mrs. W. J. Hillyard, Mr. and Mrs. W. W. Gillrie and Mr. W. D. Spence spent a pleasant time at Stony Creek last Sunday.

Mr. and Mrs. J. A. McElhee, Evelyn and Bernice left on Monday for Vancouver where they will holiday for the next two weeks.

Mrs. Margaret Fisher who has been visiting for the past month with her son Mr. But Fisher and family, returned to her home at Mount Brydges, Ont. on Tuesday.

Mrs. Harold Clemens and daughter Jean returned to their home at Edmonton after a week's visit at the home of Mr. and Mrs. M. B. Clemens.

Mr. John Mortimer who has been visiting at North Guelph, Ontario for the past few weeks returned home Monday night after a very enjoyable holiday.

Dr. and Mrs. Baines and family of Leader Sask. who were vacationing at Sylvan Lake, stopped here on their return trip, on Thursday last, to visit Mr. and Mrs. H. L. Wall.

Mr. and Mrs. Henry Atkinson and Mr. and Mrs. Wilfred Atkinson and son John, left by motor on Wednesday for Winnipeg. Mrs. Henry Atkinson has been in poor health and we hope the change will benefit her.

Miss Butterfield, missionary on furlough from Palestine, will speak in the M. B. C. Church on Sunday, August 12th at 7.45 p.m. The Message will be illustrated by lantern slides. Do not miss this opportunity of hearing first-hand information of conditions in the Holy Land.

Amongst the successful pupils at the recent High School examinations we note that Jessie McCoy made 75 marks (Honors) in Latin 2, and that Bernice McElhee made 82 marks in Latin 1 (Honors) and 68 in Latin 2. As Latin 2 was not taught in the High School last year these pupils were coached privately by Mrs. A. J. Mitchell and took the two years' course in one year.

## Three Hills Wedding, Calgary Interest

The home of Mr. and Mrs. E. P. M. Neiman was the scene of a pretty wedding when Mrs. Neiman's sister, Katherine, daughter of Mr. and Mrs. Peter Fox of Bentley, became the bride of Mr. Robin Peel Doherty, son of Dr. and Mrs. R. P. Doherty of Vancouver.

Charming in a suit of navy silk crepe touched in white, with white accessories, the bride was attended by her sister, Miss Lydia Fox of Didsbury. Mr. E. P. M. Neiman attended the bridegroom, and Rev. C. Corcoran officiated. A wedding breakfast followed the ceremony.

Mr. and Mrs. Doherty, who have many friends in Calgary, left by motor for the coast, and on their return will take up residence in the Bessborough apartments, Calgary.
